

SHREDDER CAGE

Exclusive patented design to reduce safety hazards related to shredder plant operation, the Harris Shredder Cage is the most effective safety addition to your plant.

Harris Shredder Cage

At Harris the safety and welfare of our customers is considered in everything we design and manufacture. Through an innovative design, Harris is proud to offer the Harris Shredder Cage to decrease the amount of debris expelled from shredders.

Designed originally as an option for Harris built shredders, the Harris Shredder Cage can be retrofitted to your existing shredder with the quality you would expect from Harris. Providing visibility to the shredder's operation, the structure and stainless steel net ensures maximum resistance to impact, explosions and offers absolutely no interference with maintenance or operation with quick access to the feedramp in case of feed jams or other maintenance issues. The innovative design does not increase fluff or dirt accumulation on the net.

Covered by a patented design and supported by Harris, the Harris Shredder Cage can be installed on any shredder, regardless of the manufacturer or size.

Unit is not connected to the shredder or Infeed Conveyor to avoid problems associated with vibration

Wider than the feedramp and Infeed Conveyor to avoid material catching on the net

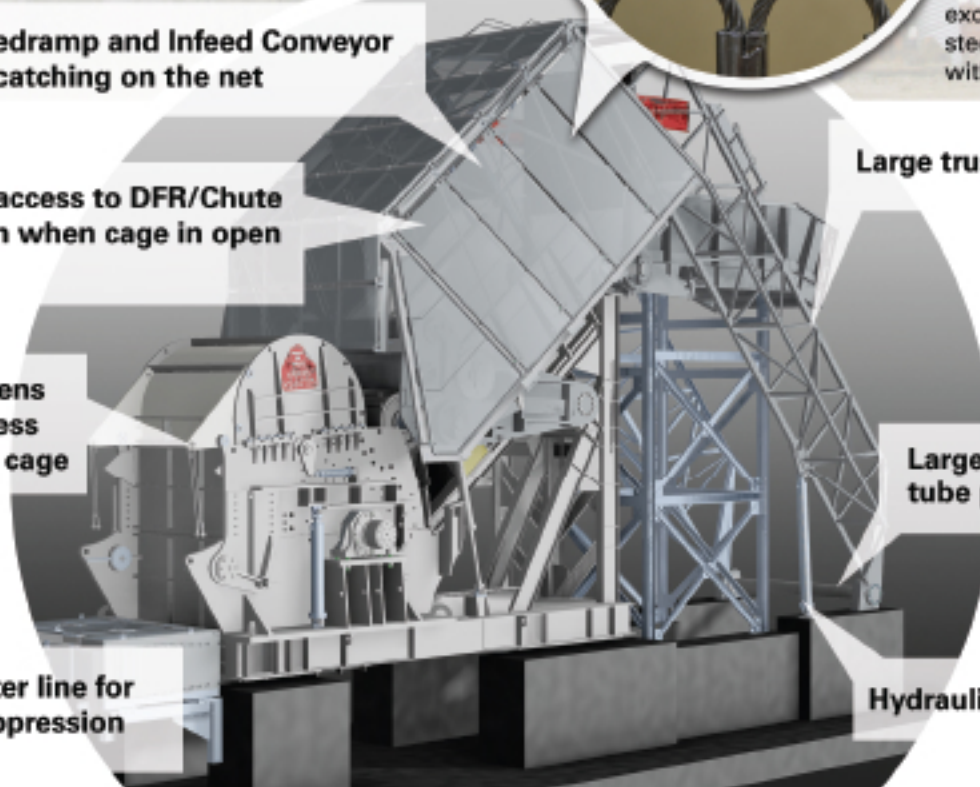

Quick scrap handler access to DFR/Chute area during operation when cage in open and locked position

Midsection/Hood opens normally for mill access without opening the cage

Option to add a water line for dust and/ or fire suppression

exclusive stainless steel cage material with ferrule connections

Large truss frame structure

Large diameter torque tube pivot connection

Hydraulically operated
